

Career Opportunity

Lead DevOps Software Engineer

Fortified Insight is a fully remote company that fosters a fun, caring, and fast-paced work environment. We understand that a positive work culture is essential for the well-being and productivity of our team members, which is why we prioritize building strong relationships and encouraging open communication. Our team members are encouraged to take initiative and contribute their ideas to help shape the future of our company.

As a cutting-edge technology company, we are always looking to disrupt the market and stay ahead of the curve. Our team members have the opportunity to work on challenging and innovative projects that push the boundaries of what is possible. This presents a unique opportunity for personal and professional growth, as team members have the chance to develop new skills and gain experience in emerging technologies.

Working at Fortified Insight also comes with numerous benefits, including competitive compensation packages, comprehensive health benefits, and the opportunity to participate in the company 401k program. We also offer flexible work arrangements, which allow team members to work from anywhere in the United States and maintain a healthy work-life balance. Additionally, we are committed to giving back to our community, which allows team members to make a positive impact on the world around them.

Fortified Insight is an equal opportunity employer. Eligible candidates must provide evidence of legal working status for any employer in the U.S.

Job Summary

The Lead DevOps engineer is a teacher of the DevOps mindset, a conduit of best practices, who helps create a culture of continuous improvement through innovative solutions, information transparency, and automated process. In this collaborative engineering role, you will work closely with the software delivery teams and other lead engineers, guiding continuous integration and deployment for software solutions. As a Lead DevOps Software Engineer at Fortified Insight, you will play a crucial role in designing, developing, delivering, and maintaining software solutions with a general focus on automation and “DevOps” related solutions. You will collaborate with cross-functional teams including product, architecture, development, QA, and infrastructure to deliver high quality solutions. You will have the opportunity to work on exciting projects that push the boundaries of technology and contribute to the growth and success of our organization.

Duties & Essential Job Functions

- Lead the design and implementation of scalable, forward-looking solutions using the latest technologies and cloud offerings. Much of the work will be related to (but not limited to) DevOps automation such as CI/CD related solutions (testing, deployment, etc.).
- Collaborate with cross-functional teams to turn innovative concepts into reality.
- Agile Development
 - Code with agility, embracing a startup mindset to iterate quickly and adapt to evolving project requirements.
 - Develop and test software components, maintaining a focus on speed and efficiency.
- Rapid Problem-Solving
 - Identify and resolve technical challenges and bugs with speed and precision.
 - Conduct thorough testing and debugging to ensure solutions are of the highest quality.

Education & Experience

Education:

- BS/MS in CS, EE, Informatics or similar preferred but not required.

Required Experience:

- 8+ years of experience with software development.
- 5+ years of experience in DevOps, SRE, or equivalently scoped role.
- Seasoned experience in automating processes by authoring scripts, preferably written with Python, SQL, and C#.
- Certifications desired but not required.
- 5+ years of experience with and willingness to continue to learn build and deployment tools (Azure DevOps or equivalent).
- Seasoned experience with Git source control operations, source control management, and branching strategies.
- Teaching level knowledge of CI/CD practices and process, including release orchestration.
- Strong foundational knowledge of available analytics and monitoring software stack.
- Experience and working knowledge of IaaS, PaaS, SaaS, and DevOps related services available in Azure (or equivalent Cloud Provider).
- Seasoned expertise with Scrum/Agile development methodologies and tooling.
- Exemplary work ethic, attention to detail, and drive to be successful; ability to work independently with minimal supervision or assistance.
- Comfortable with conflict, saying no, swallowing pride, bringing bad news, and accepting risk.

- Seasoned interpersonal skills – ability to lead horizontally, collaboratively bridging knowledge with a variety of skill sets and teams.
- Proven experience in successfully managing change in a dynamic, global work environment.
- Standard-setting documentation and demonstration skills.

Personal Attributes:

- Excellent problem-solving skills.
- Excellent attention to detail.
- Ability to work autonomously and as part of a team.
- Excellent communication and interpersonal skills.
- Excellent English.

Work Environment

- We are a 100% remote company
- Occasional travel possible
