

## Career Opportunity

# Senior React Developer

Fortified Insight is a fully remote company that fosters a fun, caring, and fast-paced work environment. We understand that a positive work culture is essential for the well-being and productivity of our team members, which is why we prioritize building strong relationships and encouraging open communication. Our team members are encouraged to take initiative and contribute their ideas to help shape the future of our company.

As a cutting-edge technology company, we are always looking to disrupt the market and stay ahead of the curve. Our team members have the opportunity to work on challenging and innovative projects that push the boundaries of what is possible. This presents a unique opportunity for personal and professional growth, as team members have the chance to develop new skills and gain experience in emerging technologies.

Working at Fortified Insight also comes with numerous benefits, including competitive compensation packages, comprehensive health benefits, and a retirement plan. We also offer flexible work arrangements, which allow team members to work from anywhere in the world and maintain a healthy work-life balance. Additionally, we are committed to giving back to our community, which allows team members to make a positive impact on the world around them.

Fortified Insight is an equal opportunity employer. Eligible candidates must provide evidence of legal working status for any employer in the U.S.

### **Job Overview**

As a Senior React Developer at Fortified Insight, you will lead the development of our web application and contribute to the overall architecture and technical direction. You will work closely with our product team, designers, and other developers to deliver high-quality and scalable web solutions.

### **Key Responsibilities**

As a Senior React developer, you will:

#### **Front-end Development:**

- Lead the development of a dynamic and responsive portal with sophisticated dashboards utilizing the React JS library.

### **Architecture and Design:**

- Collaborate with the team to create robust and scalable architecture, ensuring the performance and usability of web applications.
- Translate Figma designs and wireframes into high-quality code.
- Develop reusable components and front-end libraries for future use.

### **Support:**

- Maintain and enhance the portal based on feedback and analytics.

### **Collaboration:**

- Collaborate closely with cross-functional teams, including designers, backend developers, and stakeholders, to ensure seamless integration and the realization of the envisioned functionalities.
- Ensure the technical feasibility of UI/UX designs.

### **Optimization:**

- Optimize applications for maximum speed and scalability, keeping up to date with industry trends and best practices.

### **Code Review:**

- Review and provide constructive feedback on code written by team members, ensuring code quality and best practices.

### **Testing:**

- Write and maintain unit tests and end-to-end tests to ensure the reliability of the web application.

### **Documentation:**

- Assist in the creation of technical documentation and user manuals.

## **Qualifications**

### **Required Skills:**

- 5+ years of proven experience in React JS development as a Senior Developer, including a deep understanding of React state management libraries such as Redux or Context API.
- Experience with popular React workflows (such as Flux or Redux) and routing libraries (like React Router).

- Proficiency in front-end development languages and tools such as HTML5, CSS3, JavaScript/TypeScript, and webpack.
- Strong understanding of RESTful APIs and modern authorization mechanisms, such as JSON Web Token.
- Experience in responsive design principles and implementing complex visualizations using Elastic UI and Apex charts libraries.
- Familiarity with version control systems (e.g., Git) and collaborative development workflows.
- Proficiency with browser testing and debugging.

### **Preferred Skills:**

- Experience with back-end API development frameworks, such as Node.js or ASP.NET is a plus.
- Previous experience with building dashboards and portals.
- Knowledge of a CSS pre-processor like SASS or LESS.

### **Personal Attributes:**

- Excellent problem-solving skills.
- Excellent attention to detail.
- Ability to work autonomously and as part of a team.
- Excellent communication and interpersonal skills.
- Excellent English.

### **Work Environment**

- We are a 100% remote company
- Occasional travel possible
